25X1A2g Evaluation of Response to Requirements for [REDACTED] 25X1A2g 25X1A1g
REF : [REDACTED], 2 July 1958, Confidential, and [REDACTED]
25X1A1g Memorandum, 27 May 1958, Confidential, dealing with same
source [REDACTED] 25X1A2g

The referenced reports include direct answers to all the questions we submitted for this source. The response [REDACTED] to 25X1A2g our initial requirement was sufficiently good that we were encouraged to ask further questions which were responded to equally well.

Although it is not possible to evaluate some of the substance of the reports, they did provide information and opinion on topics of importance. We appreciated the exactitude with which the questions and instructions were applied and the relative promptness of the responses. It was helpful to have it stated that source had no knowledge on a given subject where that was the case. The interrogator(s) and/or the source displayed imagination in developing the requirements, particularly those first submitted which were in brief form.

We should appreciate your passing on our satisfaction to those responsible — both here at headquarters and in the field.
